Abstract. The purpose of this research is to see what the community needs by utilizing the interests of consumers who are environmentally friendly, also attractive in business opportunities. Because of that we take samples of products that have been used in Japan namely, Coin Lockers. To support the research, we used a method of exploring reviews of several articles related to our research products. The results of this Coin Lockers show are very much needed by the people, especially the Japanese people, to store some things they don't need to carry. From this result, we know that this product is important as support for facilities that can be obtained by the community. That's because it's easy to use, Coin Lockers also to save the user's money. Of course, Coin Lockers is very beneficial for business people who want to try this new business path that is environmentally friendly and quite sophisticated in our country.
